Course Objectives:

This course presents an analysis of contemporary capitalist economic systems from the perspective of the Marxian/Radical (left) tradition in economics. The primary focus is on the functioning of advanced capitalist systems - particularly the U.S. economy. What is the contribution of Marxist/Radical political economy to our understanding of the functioning of modern capitalism? What are capitalism's laws of motion and what are the more important elements of the structure of advanced capitalism? What are capitalism's strengths and weaknesses?

This course begins with an examination of the Marxian view of historical change along with theories of value, class and capital accumulation. The industrial structure of advanced capitalism, the functioning of its labor markets and the Marxist/Radical theory of government activity are studied, followed by an examination of the determination of national production, income, employment and macroeconomic policy (i.e. macroeconomics from a left perspective).

Given this perspective of the functioning of advanced capitalism, the course includes analyses of social problems including merger mania and rising monopoly power, rising domestic and global inequality, poverty, discrimination, alienation, environmental destruction, recessions, unemployment, inflation, “new economy”, globalization, imperialism and war. The course concludes with an examination of the political economy of capitalism, socialism and democracy.

This course has as its prerequisite ECO 1000 or ECO 2013 or CI. Calculus is not required.

Texts Required:
3. Readings in Radical Political Economics – 2008 (P) AVAILABLE AT PRO-COPY

Texts Recommended (but not required - to be discussed in class)

On Reserve:

Grading System

Course grades in ECO 4323 will be determined through a contract grading system. The workings of the system are outlined in the following paragraphs.

A set of two exams will be distributed during the course according to a prearranged set of dates. These exams will be take-home open book essay type. Roughly one week will be allowed to work each exam. The exams will then be graded on a satisfactory/unsatisfactory (S/U) basis with suggestions for improvement by the instructor. Essays which have been graded unsatisfactory (U) may be done over and re-graded. Satisfactory performance on all exam essays entitles the student to a grade of D. Consistent class attendance is also required for a grade of C.

Students who wish to receive a grade of B may elect (in addition to satisfactory performance on all exam essays and consistent attendance) to undertake a project in consultation with the course instructor. A specific project list will be provided by the instructor. These projects will be graded on a S/U basis. Projects graded U may be done over. Participation in class discussions is also required for a B grade.

Students who desire a grade of A in the course may elect (in addition to satisfactory performance on all work necessary for a B in the course) to undertake a second project in a course area different from that chosen for the B-project. Projects are graded on a S/U basis. Unsatisfactory projects may be re-done. Further details concerning these projects will be provided by the course instructor.

Plus/minus grades will be attached to grades at the instructor’s discretion.

NOTE: The University of South Florida has an account with an automated plagiarism detection service which allows instructors to submit student assignments to be checked for plagiarism. I reserve the right to request that assignments be electronically submitted to Blackboard. Assignments are compared automatically with a huge database of journal articles, web articles, and previously submitted papers. The instructor receives a report showing exactly how a student’s paper has been plagiarized. For more information, go to http://www.ugs.usf.edu/catalogs/0304/adadap.htm#plagiarism
Important Dates

Exam Dates:

    Exam I    - 9/25-10/2/08
    Exam II   - 11/13-20/08

Project Deadline Dates:

    Project Sign-up - 9/18/08
    First Project  - 10/23/08
    Second Project - 11/13/08
